

Juice

10-30 Gallons (35-113 L) per Hour

106-320 Bottles (12oz) per Hour

108-322 Bottles (350ml) per Hour

**depends greatly on produce*

Power

220V Single Phase Power
(adaptable plug option)

3HP Motor

Specifics

Overall Dimensions:

29in W x 43in L x 70in H
(74cm W x 110cm L x 178cm H)

Base Footprint:

26in W x 28in L x 63in H
(66cm W x 71cm L x 160cm H)

Net Weight: 445lb (209kg)

Features

Pulse Press Technology

Speed Control Shredder & Press

Excellent for Fibrous Produce

Fantabulous for Nut Milks

100% Washdown

Electropolished

Stainless Steel

Made in the U.S.A.

The M75

Cold Press Juice Machine

Tough, but tactical.

Compact yet powerful, this little crackerjack makes 3x the juice and has 3x the shredding power of the CM25. The larger motor shreds the toughest produce without overheating, that's why we recommend at least the M75 for anyone pressing hard produce like ginger or turmeric. Even for just a tiny amount. Because heat would destroy the precious enzymes in the juice, and we don't want that (that's why we love cold press, right?).

The M75 is super versatile as a small starter machine or as a supplement to a bigger main machine. It's great for starting small to test the waters, or for making boutique blends alongside your bulk juice recipes.

Good for smaller businesses, storefronts and distributions, the M75 suits large home operations or small commercial kitchens.

1229 Columbia Avenue, Unit C1
Riverside, California 92507 USA

All our free-standing machines include the following awesome features to help make your juicing experience even that much more awesome.

Not all of these standards apply to the CM25 or the M800 due to their already special capabilities.

ELECTRICAL MODIFIABILITY

All Juiced Rite machines are built in the US with standard electrical options, but are easily adaptable to any regional specifications. To see specific electrical standards for each machine, check out our downloadable comparison sheet. Understanding your electrical needs is important and we work with you to make sure you're set up correctly from the start.

100% WASHDOWN

Our machines are made of stainless steel and are 100% washdown ready. We choose a higher quality electropolish over standard passivation so you can rest assured your machine is finished to create incredibly safe and high quality juice. Electropolish also aids in cleanability (just use a food safe alkaline wash and acid sanitation routine) which makes machines (and juice) happy. Win win!

OWNER EMPOWERMENT

We purposefully design our machines for YOU to maintain. Why spend time finding and paying a technician when you can service the machine yourself and prevent excessive down time? We empower you to handle your own business (literally). We even offer optional Training and Set Up for all new machines at the time of delivery. Get your questions answered and feel confident you can do ALL.THE.THINGS. At the push of a button. Literally.

Updated February 2022

PRESS PULSE PROGRAM

Save time and increase your yield with our proprietary pre-programmed press cycle (say that 5 times fast). We've got science working for you to save time and energy (yay for science!). Our Press Pulse Program™ eliminates the extra work to get more juice yield- no need to wait to push buttons or stir to get more juice. Call us to learn more, and we can nerd out on all the fabulous science together (it's so fun).

ULTIMATE SPEED CONTROL

Have supreme control with the ability to customize your speed for shredding and pressing. Produce with higher water content may benefit from a slower press to increase yield, and with speed control, you have the power to test that. Many specialty juicers have found significant benefit to their nut milk and wine production (among others!) with controlling the speed throughout their pressing process.

ACCESSORIES FOR EVERYONE!

All the things you need to get started juicing right out of the box (or shrink wrap!). Each machine comes with a full set of press bags, three blade types that work with a variety of produce, exclusive wave boards that interlock to create an irregular surface area to maximize yield, and a shredder skirt to minimize the mess (juicing will always be messy but we can help make it a little less!). Get set up and get juicing!

SAFETY COMES FIRST

Safety is a top concern when you're using super fast, super sharp blades and powerful hydraulics. Thankfully, our machines have integrated safety locks on our shredder system and emergency stops that automatically shut down and open the machine when disconnected or pressed. We've also included safety guarding where possible and each danger zone is clearly labeled.
