

Hydraulic Oil System - Maintenance Log

Instructions:

Record Maintenance – Log each check below to track trends and ensure proper upkeep.

Weekly Checks

--> **Check Oil Level** – Ensure oil is at the proper level, halfway up site glass. Add oil if low.

--> **Inspect Oil Condition** – Compare oil color to the chart below:

Super Clear -
Good! – No action needed.

Slightly Dark –
Monitor for changes.

Dark + Thick –
Change immediately!

--> **Check for Leaks** – Inspect around hoses, fittings, and seals. Tighten if loose, replace if damaged. (Call for instructions on proper tightening!)

Replace as Needed:

--> **Replace Oil Filter** (Every 4-6 Months) – Install a new filter to maintain oil cleanliness.

--> **Replace Oil** (Every 12-36 Months) – Complete oil change as needed based on oil quality.
